

## International Valve and Instrument Valve Technician

International Valve and Instrument ([www.safetyvalverepairs.com](http://www.safetyvalverepairs.com)) is a full service valve repair and testing facility for all types of valves including pressure relief valves, located in Springfield, MA. In 2019 IVI became a part of The Collins Companies, headquartered in East Windsor, Ct. Founded over 100 years ago, The Collins Companies is a distributor of industrial pipe, valves and fittings with eight branch locations in Connecticut, Maine, Massachusetts and New York.

Collins executives have built the company by encouraging every employee to “think like an entrepreneur” and they back that statement up by sharing a significant percentage of their annual profits with every single member of their team. Because of this philosophy, the average tenure of a Collins associate is more than 19 years. In addition, Collins officials credit much of the company’s success to a flat management structure that allows each associate the freedom to think for themselves on how to best serve their customer, their company and ultimately themselves.

### **About the job:**

Valve technicians at International Valve and Instrument are the face of our company. We are looking for mechanically inclined personable associates to join our team. We are looking for an individual with a proven record of accomplishment in the valve repair industry.
